

# Detail Devils® Solvent-Free Degreaser Product Usage Guide

---

The Detail Devils Solvent-Free Degreaser is perfect for use on all types of vehicles, as well as around your garage and on your tools and other machinery. It emulsifies grease and hard core grime without breaking a sweat, and unlike other common degreasers on the market, because it is green and solvent-free, it is safe for use around your vehicle's delicate paint finish and other coated areas. Our degreaser does not contain petroleum distillates, yet performs better than most commercial degreasers.

It is perfect for use in and around your vehicle's engine, as well as on wheel wells, fenders and rims. The multi-component formula was designed to attack oil, grease, tar, and other heavy contaminants.

## **Directions:**

Spray on affected area, and let sit for 10-20 seconds. For tough ground in grease, use a light scrub brush on metal parts (though never around painted areas) to loosen the contaminants, and wipe with a heavy-duty micro-fiber towel. For lighter grease and oil spots, wipe with a clean micro-fiber towel. When cleaning an engine, warm is OK, but never spray degreaser or any other cleaner on a hot engine. Start from the top and work your way down the vehicle or other work area.
