

Kiss My Glass® Quick Detailing Spray Product Usage Guide

Use the Kiss My Glass Quick Detailing Spray to remove whatever the road has to throw at your vehicle. The multi-component cleaner and wax works miracles removing bird bombs and bugs, as well as streaks, water spots, and other dirt and residue.

Our special formulation evaporates quickly to prevent further spotting, leaving behind a beautiful organic wax protectant to enhance your gloss and leave a beautiful showroom shine. While you have many choices in Quick Detailing Sprays on the market today, only Kiss My Glass' Quick Detailing Spray cleans and protects with a smooth wax finish, while being recognized by the US EPA for safer chemistry.

The top concern most car enthusiasts have with detailing is scratching or dulling the paint. Our Quick Detailing Spray is perfectly safe following a few simple guidelines.

Directions:

The first step is to make sure you are only detailing a car with light residue. Anything heavier should be washed before detailing.

Second, use only a plush heavy weight micro-fiber towel for detailing. Starting on the upper surfaces first, spray the Kiss My Glass Quick Detailing Spray in a 2 foot by 2 foot area, gently wiping in one direction so as not to rub dirt back into your vehicle's delicate surface. As the Micro-Fiber Buffing Towel becomes dirty, fold to a clean side and replace with a fresh towel as needed. Wipe in a straight motion until each individually treated area is dry. The haze that's left behind is our carnauba wax. It should be buffed with a clean micro-fiber towel for a brilliant shine that also protects your vehicle's finish!
